

Dear Parents,

We hope you have had a restful break this Easter, which this year has been quite unusual for everyone. On our behalf, we are feeling recharged and ready to take on the third term with a continued desire and energy to offer the best education and support to our students.

Precisely in our effort to give the best of ourselves, we want to invite you to participate in an initiative presented to us by "Fundación Tomillo", a non-profit organization dedicated to the development of different programmes aimed at children, adolescents and families, as well as training and socio-occupational orientation.

Currently, the Foundation is organising a campaign to collect and donate technological devices for families in vulnerable situations. As you know, there are many children who, due to the crisis we are experiencing, have difficulties continuing their studies online due to the lack of resources of this type.

To try to help them, the foundation has made available to families who want to collaborate, a very simple process of collecting laptops, tablets and mobiles in good condition that we currently have no use for. The devices will be used for the nearly 500 families in vulnerable situations with whom the foundation currently works.

The process to donate is as follows:

- 1) Send an email to informatica@tomillo.org indicating in the subject **Donación de equipos Tomillo** and explaining what type of device it is.
- 2) The Foundation's IT team will get back to you to verify that the device meets the requirements and will proceed the order for collection at your home.
- 3) The courier company MRW is collaborating with this campaign and they will collect the device as soon as possible.

For more information, including a small guide with the devices suitable for donation, you can access this page: <https://tomillo.org/stopcovid19ginspired/>

As always, thanks for your support and collaboration.

Greetings,
